

Calibration of diaphragm meters

Assembly line of residential gas meters

PREMAGAS SLOVAKIA

Big Importance for a Considerable Market Area

The production of gas meters in Slovakia started in 1922. In 1935, a production plant was established in Stara Tura and in 1992, as part of the privatization, the company Premagas was established with Elster as the majority shareholder.

In the last few years, Premagas has undergone a marked modernizing of the production technology and metrology equipment and is now on an equal level with the other companies of ELSTER-AMCO Group.

Assembly of BK2.5

As one of the leading producers of diaphragm meters type BK2.5 up to a flowrate of 6 m³/h, diaphragm gas meters type G4/G6 MKM up to a flowrate of 10 m³/h, Premagas delivers these meters to the markets of Slovakia, Czech Republic, Slovenia, Croatia, Ukraine, Kazakhstan, Russia, Moldavia, Iran, Armenia and other countries. In the last few years, Premagas has become an important producer of rotary piston meters and their parts and its products are well-known throughout the world. What is also important is the production of turbine meters from G160 up to G2500. The goodwill of the company Premagas runs also by the Joint-ventures in Ukraine: Premagas-Kromschroeder Ukraine and in Moscow: Meteko-Premagas. Jointly set up assembly lines have been installed in Iran and Armenia.

Managing Director
Dusan Fridrich

Premagas produces and supplies with around 300 employees gas measuring devices for households, commercial facilities and industry. The Production program includes diaphragm gas meters, rotary piston meters, turbine meters and accessories.

Premagas, a member of ELSTER-AMCO Group, also offers electronic devices, regulators and automatic meter reading systems.

Premagas is a company that through the quality and variety product program of its products and services has throughout the years maintained the confidence of its customers. After joining up with ELSTER and Kromschroeder it has joined the ranks of these companies with an international importance.
