

GASEX IN SUNTEC SINGAPORE MAY 31 – JUNE 3, 2004

Conference & Exhibition

The gas industry of the Western Asia Pacific Region is expected to set record-breaking sales and revenues in the near future. With a value of more than US\$ 7 billion, Western Pacific accounts for more than 20 percent of the worldwide industrial, medical, and specialty gas business.

As more and more countries use gas as their fuel of choice and the construction of pipeline networks gather space, significant growth is foreseen. The development of untapped gas fields and the maximization of the natural gas resources in the region is expected to take place in the near future.

The Western Pacific Region's official platform for information exchange, GASEX 2004 will highlight the regional and global developments that have current and future impact on the gas industry. It will prove to be an effective event where stakeholders gather to be informed of the policies, businesses, and technologies that drive today's gas industry.

We at ELSTER-AMCO would like to take this opportunity to present our range of products and services and to discuss the day-to-day issues relating to gas with our valuable customers.

Throughout the four days of the exhibition, our booth will be home to our specialists from various affiliates, who will gladly make themselves available to all visitors.

We look forward to seeing you at booth E5 – E8 in Suntec, Singapore.
