

GAS BERLIN 2006

Berlin was worth a trip

From the 3rd to the 7th of April more than 26,000 people visited the 'Wasser und Gas Berlin' trade fair. 630 exhibitors from 30 countries were there to display their products and services over a total area of 46,000 m². At this fourth 'Gas Berlin' fair, new technologies in the field of gas distribution were at the forefront. In view of the liberalisation of the markets, there was particular interest in the automation of gas metering and in the latest possibilities with regard to data management. As far as we are concerned, the 'Gas Berlin' fair is the most important event in Germany.

Elster-Instromet was on display under the motto 'The Brand of Innovation' and presented a number of complete system solutions for a variety of fields, all from under one roof. Elster-Instromet is one of the few manufacturers offering complete system solutions in the field of gas transportation metering.

The well-known in series connection of the SM-RI.X4X turbine meter and the Q.Sonic ultrasonic meter together with the corresponding flow computers from the gas-net series has now been complemented with the addition of the EnCal 3000 gas quality analyser.

Other new developments on display included the following:

- > The IRM1 rotary meter with an S1D Absolute-ENCODER index
- > The new BK-G100 industrial diaphragm meter, now also including a Z6 Absolute-ENCODER index
- > The M-Bus interface for gas meters which have an Absolute-ENCODER index
- > The new DL210 data logger, which is an ideal complement for smaller rotary meters or industrial diaphragm meters with either an S1D or a Z6 Absolute-ENCODER index
- > ReadMobile for PDA and wireless Bluetooth interface – mobile readout software for Elster-Instromet data loggers and volume correctors
- > EuroTRACE 868 – a new radio solution for transmitting meter readings

Many of the visitors to the fair gladly took the opportunity to pay us a visit at our stand and were rewarded with a wealth of information and an interesting dialogue with our experts.

World Gas Conference Amsterdam 5 – 9 June 2006

We look forward to seeing you at our booth No. 3.303 in hall 3!
