

The Gas World is our Guest

From the 5th to the 9th of June this year, the Gas World turns its attention to the Netherlands. The 'World Gas Conference' opens its doors in Amsterdam and the largest gas trade fair goes along with it (fair opens on June 6th). We will be there, and we will be displaying the largest and most comprehensive range of products and services in the field of gas metering and regulation.

Through the subsidiary 'Ermaf', the name Elster has been active in the Dutch market for over 100 years. On top of that, the Instromet Group's roots can be found in the Netherlands and in Belgium. Therefore, we believe that we have a little bit of a right to consider ourselves as 'hosts' of this international conference.

ENCODER meets GOUDA! Even if the catering at our stand might have a decidedly Dutch flavour, the technologies on display will certainly be of international interest. From CHEKKER to Absolute-ENCODER, from residential diaphragm meter to gas chromatograph, from radio module to volume corrector with a GSM modem and from mobile readout software to Supervisory System, all of our new product developments will be on show. These are all future-oriented products and technologies which our customers from all over the world expect to see and touch, including the relevant competent information and expert advice to go with them.

This appearance at the World Gas Conference will be the second large trade fair for our team in only two months. The 'Gas Berlin', which is of particular interest to our customers in Central and Eastern Europe, has only just closed its doors. In times of ever-dwindling budgets, a large number of exhibitors and visitors are now realising they have to pick and choose which fairs to concentrate on. It would without doubt be beneficial to everyone if a fair with an international touch like 'Gas Berlin' and the 'World Gas Conference' were further apart in terms of the calendar.

We are looking forward to meeting our visitors from all over the world, and of course those form nearer home, too. After all, for some of our German customers, Amsterdam is closer than Berlin. Why not come along and join us at our stand No. 3.303 in Hall 3? Take your time and find out all you need to know, and at the same time enjoy a piece of real Dutch cheese. We always like to make our guests feel at home!

Best Regards
Peter Hampel
