

Gas & Energy Exhibition A successful POGEE

Natural gas plays a very important role in the day-to-day life of every Pakistani, whether relating to the domestic use of natural gas in the kitchen or the use of natural gas to generate electricity in-house in a wide range of industries including textiles.

Pakmaco (Pvt) Ltd, Elster-Instromet's agent in Pakistan, arranged for a stand at POGEE 2007 to display a wide variety of Elster-Instromet products including the ever-popular quantometers and electronic volume correctors. The demo model of the ultrasonic gas meter was specially flown in for the exhibition and it attracted a large crowd of engineers from gas utility companies and generated interest in the use of the USM both in general and for custody transfer purposes. In fact, the USM was the most favoured of all the Elster-Instromet products on display.

consumption on the users' premises. They do not have to wait for the month-end bill from the gas utility company to calculate their consumption pattern.

Visitors from all sectors of industry in general and from the gas industry in particular visited the Pakmaco exhibition stand. It was the 5th Pakistan Oil, Gas & Energy Exhibition and took place from 16 to 19 May. In fact, the visitors kept the staff on their toes almost all the time with enquiries. In a nutshell, the exhibition of Elster-Instromet products was a success. Pakmaco hopes to be at POGEE next year again. And we would be pleased to welcome you there!

The quantometers along with the EK210 are very popular and play a very significant role in monitoring the natural gas
